

SUMMARY

Dedicated Automation Engineer with 2+ years of experience in Functionality Testing, Integration Testing, and System Testing. Proficient in C#, MySQL, and Python with a solid understanding of both Manual and Automated Testing processes. Skilled in the full Automation Life Cycle, including designing, developing, and executing automation strategies. Experienced in API Testing and leveraging Joget Workflow for creating web-based business process management applications. Adept at delivering high-quality, efficient automation solutions while collaborating across teams to enhance system functionality and performance. Committed to delivering efficient, user-friendly solutions that enhance operational efficiency and user experience.

SKILLS

- Language : Python
- Web Technologies : (HTML, CSS, Bootstrap , JavaScript)
- Databases : MySQL
- Code Editor : (IDLE , Visual Studio Code, Colab),
- Frameworks: Flask, Django
- Libraries: Numpy and panda

EDUCATION

PSNA College of Engineering and Technology

Bachelor's of Engineering
2017 – 2021

Electronic and communication Engineering
CGPA - 7.59

SRM Institute of Science And Technology

Master's of Business Administration
2022 – 2024

Business Analyst
CGPA - 8.59

PROFESSIONAL EXPERIENCE

System Engineer

Infosys Pvt Ltd | Feb2022 - Jan 2024

- Automation Expertise: Skilled in Robotics Process Automation (RPA) and Web Automation to streamline repetitive tasks and automate testing using tools like Selenium, Cypress, and Playwright for web applications.
- Quality Assurance: Proficient in developing test cases, executing tests, and creating detailed test plans to ensure software functionality, integration, and performance meet high standards.
- Reliability & Performance: Focused on ensuring software operates reliably under various conditions, optimizing performance and user experience across systems and platforms.

PROJECT

Experienced Automation Engineer with expertise in Robotics Process Automation and Web Automation, focusing on ensuring overall functionality through rigorous testing. Proven track record in Quality Assurance, including the development of software test cases, execution, and the implementation of comprehensive test plans to ensure software reliability and performance.

Project: Molina Healthcare

Worked on Molina Healthcare, a leading American healthcare company that provides health insurance through government programs like Medicaid and Medicare. Contributed to the development and execution of automated tests to enhance system functionality and ensure seamless integration of health insurance platforms.

ROLES AND RESPONSIBILITIES

- Collaborated with cross-functional teams to analyze system specifications and business requirements, ensuring alignment between testing efforts and project goals.
- Gained hands-on experience in Web Automation and RPA development using Assist Edge RPA, C#, and the .NET framework to automate workflows and improve testing efficiency.
- Created and executed SQL queries to validate and manipulate data, ensuring comprehensive database testing and data integrity.
- Actively participated in planning and estimating testing strategies, identifying critical testing areas, and ensuring efficient resource use.
- Contributed to creating test scenarios and test cases for functional, regression, and integration testing, ensuring thorough coverage of all requirements.
- Generated detailed bug reports, tracked defects, and worked closely with developers, business analysts, and stakeholders to ensure timely project delivery and successful execution.

DECLARATION

I here by declaration that the above statements are true to the best of my knowledge and belief
